

INFRARED (IR) THERMOMETER

UA 120/6801

PRODUCT SHEET

SPECIFICATIONS

- ✓ Contactless infrared measurement
- ✓ 0.5 seconds fast temperature measurement
- ✓ Precision: 0.2 degrees
- ✓ LCD display with backlight
- ✓ Can also measure object temperature
- ✓ Suitable from +0 months
- ✓ Automatic shutdown: after 12 seconds

New innovative IR thermometer enables contactless (infrared) temperature measurements at the touch of a button. The built-in dual laser pointer increases target accuracy, while the backlit LCD screen and convenient push buttons combine for easy, ergonomic operation.

INTENDED FOR:

The contactless forehead infrared thermometer is intended for scanning groups and persons to elevated temperature, such as scanning potential EBOLA / CORONA virus patients.
